## 43<sup>rd</sup> IAD Conference 2020/2021

### Rivers and Floodplains in the Anthropocene – Upcoming Challenges in the Danube River Basin

*A virtual conference – 9-11 June 2021*

### 2<sup>nd</sup> Call for Abstracts open now!

After two postponements of the 43<sup>rd</sup> IAD Conference due to the corona crisis, we are very pleased to inform you that we have set the new and final date on

**9-11 June 2021**

when the event will now definitely take place, as a **virtual conference**. Even though this means that we will unfortunately not have the opportunity to meet in person in these difficult times of the pandemic, the conference will offer a valuable platform for the exchange of ideas and experiences between research and practice from the whole Danube River Basin.

The registration process for the conference will start again soon. All registrations received so far remain valid. Deadlines/important dates (see below) have been re-scheduled.

We look forward to receiving your abstract for your oral presentation!

For further information and registration visit

[www.iad2020.ku.de](http://www.iad2020.ku.de)

## Important Dates

Deadline for the submission of abstracts: 28/02/2021

Notification of acceptance: 19/03/2021

Deadline for extended abstracts: 17/05/2021

*Please submit extended abstracts only after notification of acceptance.*

## Conference Fees

As the conference will be held virtually, no conference fees will be charged!

## Access to the Virtual Conference

Access data will be communicated to the registered participants nearer the time of the conference.

## About the Host

The conference is organized by the Floodplain Institute Neuburg of the Catholic University Eichstätt-Ingolstadt. One focus of the Institute, which is based in Neuburg in the historic castle of Grünau, is on optimizing the management of the floodplain restoration project on its own “doorstep” by monitoring the ecological, hydrological and geomorphological development of the floodplain ecosystem. For more than 10 years, the institute has been engaged in various national and international projects on river and floodplain ecology, ecosystems and their services as basis for man and nature.
