submissions:

**31 October 2021**

### Message from the Guest Editor

Dear Colleagues,

Starting with the “green movement” in the past century, the awareness was raised that nature is providing values and even services for the society. The term “ecosystem services” (ES) became popular along with “sustainability”, and floodplains came back into focus. Floodplain restoration is an instrument of river management to achieve both flood protection and biodiversity as well as floodplain-related ES. Therefore, it is necessary to carry out restoration measures as sustainably as possible.

This Special Issue will comprise selected papers on the topics of sustainable floodplain restoration with regard to ecosystem services. Additional focus is on an improved floodplain ecology, which will sustain and foster habitats and consequently biodiversity. We also welcome articles from socio-ecology and sustainable engineering dealing with ES on floodplains.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 14.7 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2020).
